

Matt Hall

Senior Full Stack Engineer | React • TypeScript • Node.js • System Architecture

📍 Merritt Island, FL ✉ matt@slightlybetter.dev

Skills

Frontend

React, TypeScript, JavaScript (ES6+),
HTML5, CSS3

Backend

Node.js, Express, PHP, Laravel, System
Architecture & Data Modeling

Databases

PostgreSQL, MySQL, schema design,
SQL

Cloud & DevOps

AWS, ECS, EC2, S3, ElastiCache, GCP,
Cloudflare, Docker, CI/CD Pipelines, Site
Reliability Engineering (SRE),
Infrastructure Automation (YAML, IaC),
Monitoring & Logging

Other

REST APIs, Git, Agile/Scrum

Education

Eastern Florida State College

General Studies

Associate in Arts 2013

Eastern Florida State College

Media Production

Associate in Science 2012

Projects

Slightly Better Time (Momentum)

offline-friendly time tracking for
field teams

React/Vite, TypeScript, PWA,
IndexedDB, Node/Express, PostgreSQL,
Docker, GH

Summary

Senior Full Stack Developer with 10+ years of experience delivering secure, scalable cloud applications. Strong background in AWS (ECS, EC2, S3, ElastiCache), GCP, and Site Reliability Engineering (SRE), with proven expertise in React, TypeScript, Node.js, and relational databases.

Experience

Big Pixel LLC

Mar 2021 - Jul 2025

Senior Full Stack Developer

Remote

- Developed monitoring, logging, and resiliency testing strategies to ensure production reliability and proactive issue detection.
- Deployed and managed AWS cloud infrastructure** including **load-balanced ECS clusters**, EC2 instances, S3 storage, and **ElastiCache (Redis)** to ensure scalable, resilient applications.
- Automated deployments and infrastructure configuration with **Docker**, **CI/CD pipelines**, and **YAML-based workflows**.
- Integrated **Google Cloud services** (Maps API, geolocation, etc.) into client applications, demonstrating multi-cloud proficiency (AWS + GCP).
- Built and maintained full-stack web applications with React, Node.js, Laravel, and PostgreSQL, ensuring scalability and secure data integration.
- Collaborated with cross-functional teams in an Agile environment, translating requirements into production-ready solutions.

Florida Today

Aug 2015 - Mar 2020

Web Developer

Melbourne, FL

- Built and maintained responsive websites with PHP, MySQL, JavaScript, and HTML/CSS.
- Migrated legacy systems to modern frameworks, improving stability and performance.
- Collaborated with editorial/marketing teams to translate requirements into scalable solutions.
